

Local FOI tactics – and GDPR as a tool

- Don't be shy. Ask for documents, but also for lists of documents and other metadata
- Learn your rights to access information. You have more tools than the FOI law
- Learn to file appeals
- Check out the English interface at www.einnsyn.no – Norway's FOI portal
- Share experiences with colleagues (and competitors!)
- Does more than one office have a copy of the document you were denied? File more FOI-requests
- Learn archive language. And meet with the people in the archive!
- Remember that GDPR can be a research tool if you combine FOI with source contact
- Technical law understanding can bring you far. Add humour and source-contact, and you can fly
- Have fun
